

Creative Research and Education in Movement, Artistry and Performance

*The networking and newsfeed platform for multidisciplinary minds.*

[Start](#)

An online networking platform for skilled artists and scientists who believe in sharing their research endeavours with the wider public community.

1

To **facilitate** interdisciplinary collaborations between professional artists and scientists

2

To **share** published research and artistic works produced by member art-scientists

3

To **inform** art-scientists and the public community of cross-disciplinary events, such as conferences, panel discussions, art exhibitions and performances

# The theme?

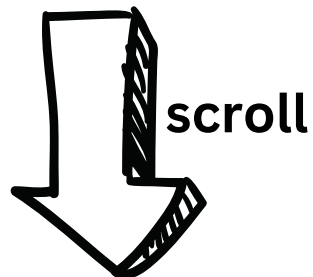

It's all about

# Human Movement

How can we **creatively map** out human motor ability to reveal discovery of its physical and cognitive mechanisms?

# This is a Call for Innovative Minds in...

Physics  
Sculpting  
Computer Science  
Music  
Robotics  
Kinesiology  
Cognitive Science  
Neuroimaging  
Sensorimotor Neuroscience  
Dance & Choreography  
Visual Art  
Psychology  
Architecture  
Expert Athletics  
Clinical Rehabilitation

...to form a publicly visible

# Community

of art-scientists who engage in

## Interdisciplinary Collaboration

and seek to resolve the

communication divide between

ART &

SCIENCE,

SOCIETY.

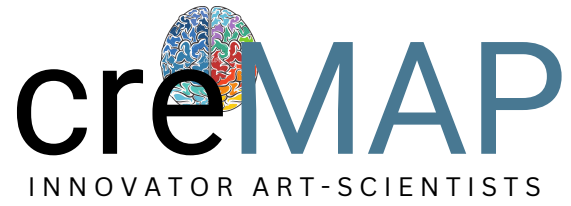

An initiative under **create**

● A community-focused organization advancing the research, education and performance of human movement.

● Explore creARTE's most recent Montréal project *Danse en Plein Air* and more at [www.create.ca](http://www.create.ca)

This is a movement.

Innovation will always be in motion.
